

## WHO WE ARE

The Toronto Construction Association (TCA) is one of Canada's oldest and largest associations of ICI practitioners with over 2,000 member companies across the GTA. Since 1867, TCA has proudly supported our members in all facets of Toronto construction by providing them with a wide range of business and professional development opportunities, a strong industry voice and the means to help shape the industry for the better.

Proudly Supporting Members.

## OUR VISION

Providing our members with the means to help shape Toronto's Construction Industry for the better.

## OUR MISSION

We create opportunities for our members to grow their individual businesses and build connections with other ICI practitioners to help boost the growth and quality of the Construction Industry as a whole.

## WHAT WE DO

### Industry Advantage

Being a part of TCA means being a part of larger voice that strives to sustain and grow Toronto's construction industry. Our voice is representative of over 300,000 industry practitioners who share the values of honesty, integrity and respect as they relate to conducting business.

TCA has also partnered with key corporations to offer our members significant financial savings through our official discount program, TCA Advantage Club.

### Networking

TCA offers a unique opportunity for you or your company to build lasting connections with a wide range of likeminded industry professionals. Expand your industry connections through ongoing social events, industry committees, courses, advertising opportunities, member job boards and more.

### Business Opportunities

With a TCA membership, companies gain access to endless project opportunities at the municipal, provincial and national scale, as well as support services to help land the job. We offer two physical plans room locations and several electronic plans room platforms for remote and round-the-clock project access. We also provide office meeting spaces, online job boards, B2B networking events, seals and documents, affidavits and more to help boost the quality and efficiency of our members' businesses.

### Professional Development

One of the core benefits of a TCA membership is the opportunity to advance your professional standing and qualifications in an industry characterized by stiff competition. TCA offers ongoing professional development opportunities through our educational arm, The Construction Institute of Canada (TCIC). Sample courses include Construction 101, Fundamentals of Construction Management, Blueprint Reading and Estimating, Construction Law and Construction Project Close Out.
