**TCA Chairman's Message 2010**

Glenn Ackerley, TCA Chairman of the Board

**The Trade Show is Bigger and Better Than Ever!**

For more than 22 years, Construct Canada has been the country's premier construction industry exposition and the 2010 Show promises to be bigger and better than ever - playing host to an expected 24,000 construction industry practitioners from all over the world. Attendees will learn about new products and services, develop an understanding of advances in green building technologies and procurement methodologies, and witness first hand the trends shaping our industry. The Show also boasts in excess of 1050 exhibits and enlightens guests with literally hundreds of presentations, seminars and technical demonstrations. Add to that the unique opportunity to interact and network with thousands of industry practitioners from coast to coast, and the payback is potentially overwhelming.

From an industry perspective, we believe the worst is now behind us in terms of the economic fallout, but there is still a great deal of uncertainty as it relates to where construction project work will be coming from as the Federal Stimulus program winds up in March, 2011. Companies have been forced to rethink the way they do business, to operate more efficiently and to look to innovate wherever possible and what better place to stay current, learn what's new and to look for new opportunities than Canada's premier industry tradeshow.

As the 2010 TCA Board Chairman, I am proud of our long association with Construct Canada and wish to congratulate George Przybylowski and his staff for another job extraordinarily well done.

Enjoy the show!

Information on how to book can be found on the CCA Conference [website](#)

**Extend stimulus deadline: McGuinty**

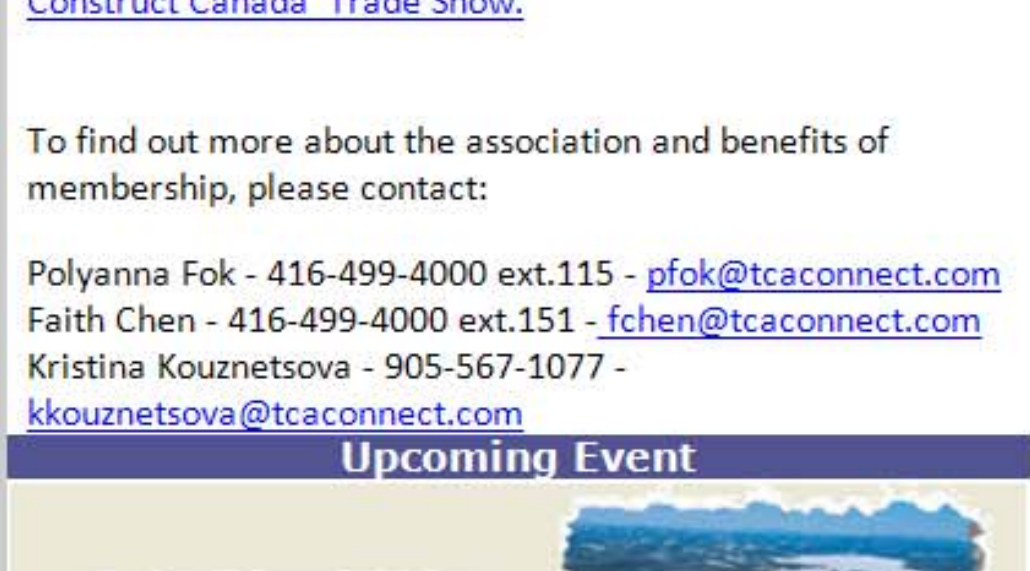

Ontario Premier Dalton McGuinty on Monday urged the Harper government to extend its deadline for infrastructure spending, as the City of Ottawa prepares to report that its late projects will cost local taxpayers \$5 million extra. McGuinty said while 98 per cent of Ontario-funded projects are on schedule, 166 are at risk. They have a total price tag of \$2.83 billion and represent 9,100 jobs, he said. [Read more](#)
